Powering HVACR progress in Nigeria

The launch edition of HVACR Nigeria, held at the Landmark Centre, Lagos, established a focused meeting point for the heating, ventilation, air conditioning and refrigeration industry.

Over three days, the exhibition brought together HVACR suppliers, engineers, contractors and decision-makers actively involved in system design, installation and operation. The exhibition floor was driven by real project requirements, with professionals evaluating solutions, comparing technologies and engaging directly with companies supporting performance, efficiency and long-term system reliability.

HVACR Nigeria brought together a broad project-driven audience, including stakeholders involved in planning and delivery for diverse sets of cross-functional needs. This depth added to conversations on-site, linking HVACR systems more closely to the wider built environment, from commercial developments and healthcare facilities to industrial and infrastructure projects.

This combined environment strengthened the quality of engagement across the exhibition floor, while maintaining HVACR Nigeria's clear focus as a dedicated destination for climate control solutions.

The launch edition sets a strong foundation for future growth, positioning HVACR Nigeria as a key meeting point for companies looking to engage with Nigeria's evolving HVACR market.

"Participating in HVACR Nigeria has been a highly valuable experience for Gree Nigeria. The event provided a strong platform to showcase our cooling solutions while connecting with industry professionals and decision-makers across the market.

With strong footfall and meaningful engagement throughout, it has created valuable opportunities for partnerships and business growth. It is also encouraging to see the industry advancing towards more energy-efficient, environmentally friendly and smart technologies.

We look forward to returning with an even stronger presence in future editions.

Kenneth Ozomah, Head of Marketing, Gree Nigeria

Participating brands included:

Showcase your solutions to buyers actively sourcing HVACR systems

Highlights from HVACR Nigeria 2026

1

A strong launch edition bringing together Nigeria's HVACR industry

2

High engagement across the exhibition floor, driven by real project discussions

3

Strong participation in HVACR Talks sessions powered by ASHRAE Region-at-Large and ASHRAE Nigeria

4

Direct access to technical decision-makers and project stakeholders

5

Practical, application-driven conversations across systems and solutions

Be part of the next edition driving HVACR business in Nigeria

Industry-led discussions and technical insights

HVACR Talks featured contributions from industry experts, technical specialists and senior professionals across the HVACR sector, with sessions supported by ASHRAE Region-at-Large and ASHRAE Nigeria.

The programme addressed key technical and strategic priorities shaping the industry, creating a focused environment for knowledge sharing and professional exchange.

Key themes included:

- HVAC system design and load calculations
- Indoor environmental quality and ventilation strategies
- Energy efficiency and refrigerants
- Cooling strategies for industrial and data centre applications
- Technical leadership and workforce development

These sessions attracted a highly engaged technical audience, supporting practical discussions around system performance, operational efficiency and evolving industry requirements.
